

## **Engineer (Fresh Graduates) - Lifull Co., Ltd**

### Job Description

You will be responsible for upgrading LIFULL HOME'S and other sites and applications, as well as developing new sites and applications.

In addition, the LIFULL Lab (<http://lab.lifull.com/>), a department specializing in in-house research and development (R&D), conducts research and development of the latest technologies such as machine learning, information recommendation, data mining, XR, and tangible UI. Almost all service development at LIFULL is done in-house, and engineers can participate in projects from the planning stage, providing an environment where they can give shape to their thoughts and ideas.

### Requirements

- Development of "LIFULL HOME'S" application for smart devices, which was selected as Google's best app in 2016.
- Find a new home with iOS, Android OS and other smart devices
- Our main job is to develop new applications and modify existing applications to make proposals.
- In addition to development, you will be involved in the entire project process, including planning and post-release maintenance.
